

Fountain of Life®

One of the most profound global crises facing the future of planet earth is its water. Contamination of the world's water has become more evident as science now has the means to measure its declining quality. **Studies show that tap water in the U.S. contains more than 2,100 toxic chemicals and most municipalities and water companies test for less than 45 of these chemicals. Nearly a million miles of underground pipe carrying America's drinking water will need to be replaced and it will take hundreds of years and trillions of dollars to accomplish this task.**

The current water crisis relates to:

- 1) the deteriorating water infrastructure
- 2) water that is treated in such a manner as to remove the wellness factor
- 3) bottled water no better than most tap water
- 4) plastic bottles contributing to contamination
- 5) several countries/local jurisdictions have or are now considering a ban on bottled water
- 6) water districts testing for only a small percentage of elements in contaminated water
- 7) new elements contaminating water are continually adding to the list of concerns

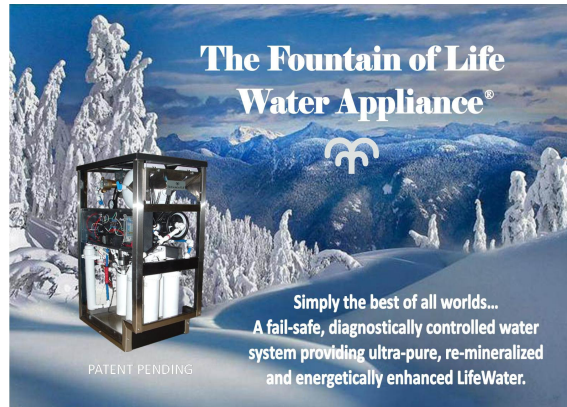

With quality issues becoming a greater concern, the American consumer is demanding that the quality of their water be improved. The only rational solution is a system that deals with the water once it comes directly into the home, office, or building. Based on science, the system provides continual diagnostically monitored data that assures the water's quality and purity. The Fountain of Life® water system is the perfect solution by providing the ultimate in highly purified and vitalized water.

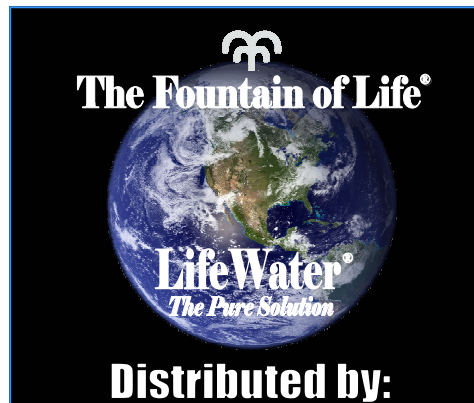

Life Just Got Better™

LifeWater® System

The Fountain of Life Water Appliance® is the ultimate solution for providing the highest quality of purified and vitalized water. Drinking water must not only be ultra-purified but healthful as well providing the consumer with the best of all possible worlds; a refreshingly pure, clean, and vitalized water. The Fountain of Life® is patent pending and designed to be self-contained for installation under the counter, in remote locations, or as a free-standing (stand alone) unit. The modular design, manufactured and installed for flexibility can be aesthetically integrated by the appropriate selection of paneling and cabinetry.

The Fountain of Life® ensuring the highest standard of quality control and product reliability for providing the best water possible. Water you can depend upon!

The Fountain of Life®

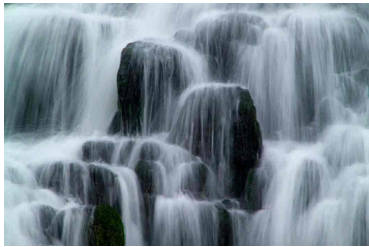

LifeWater® System

**Water The Way
Nature Intended It...**

**Vitally Pure &
Refreshingly Healthful.**

The Fountain of Life® *LifeWater® System*

There is no water system available as complete as The Fountain of Life Water Appliance®. Current water treatment methodology can remove some of the impurities but no single system incorporates the technology to effectively remove all impurities and contaminants at the “point-of-use”. The Fountain of Life Water Appliance® is an all-inclusive, self-contained unit. It includes diagnostic and monitoring capabilities that go beyond current technology producing a water that is lab grade quality, re-mineralized and vitally enhanced. Water not only pure but beneficially healthful as well.

BENEFITS OF THE FOUNTAIN OF LIFE WATER APPLIANCE®

- 1) Removes organic contaminants (chlorinated hydrocarbons, pesticides, herbicides, pharmaceuticals, petrochemicals and all other chemicals).
- 2) Removes heavy metals (lead, mercury, arsenic, etc.).
- 3) Removes pathogenic organisms, both bacterial and viral.
- 4) Removes cysts (cryptosporidium, giardia, etc.).
- 5) Removes salts.
- 6) Removes + and - ions neutralizing pH.
- 7) Eliminates residual signatures and frequencies (memory) from any exposure to heavy metals and toxic contaminants.
- 8) Absorbs and re-entrains healthful and beneficial minerals.
- 9) Activates the water molecules through our proprietary harmonic resonation technology for an energetically vitalized and structured water.
- 10) Produces water of an alkaline pH with anti-oxidant properties supportive for the reduction of oxidative stress and acidity.

LIFEWATER FLOWING FROM THE FOUNTAIN OF LIFE®

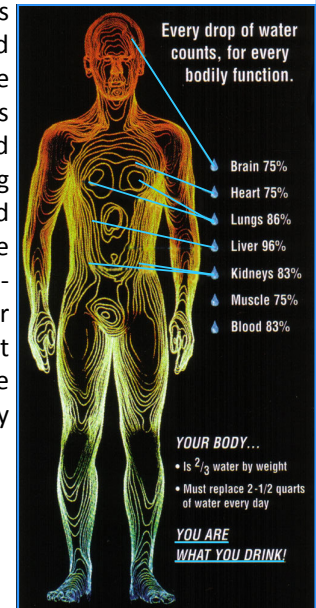

Our water enhancement technology functions as nature does by broadcasting harmonic and resonant frequencies to the water molecules causing changes to occur to their chemical structure or bonds. These “vibrational” frequencies, transmitted at particular wavelengths, are continually resonated in the water thereby activating the water molecules. The activation of the water molecules in turn, create a de-oxidizing effect which reduces reactive oxygen species. Therefore, consumption of this highly enhanced and activated water reduces free radicals to a neutralized state and produces the end result... a liquid that quite significantly propagates increased cell rejuvenation and growth leading to both short-term and long-term recognizable results in human, animal, and plant life.

"THE BEST OF ALL POSSIBLE WORLDS, PURE AND HEALTHFUL WATER"

"THE PURE SOLUTION"

Water that is or was polluted with toxins and contaminants will not develop health related hexagonal structures as shown by Dr. Emoto's work "Hidden Messages From Water". Even filtered water previously exposed to pollutants has been shown to still possess the frequencies or signatures of these pollutants. This basically is known as the “memory” of water which can create negative effects on the health of living organisms even though there is no traceable amount of any toxins or contaminants in the water. In order for humans or any living organism to flourish they must consume water with “vitality”, energetic water with life sustaining quality.

After years of research and development, Life Water Sciences designed and patented the ultimate water machine that not only would remove contaminants from the water but any residual negative frequencies or signatures as well. The Fountain of Life® was created to address the wide variety of contaminants found in water, not just specific ones localized to certain geographical areas. This was accomplished through our proprietary process of 10 stages of filtration, re-mineralization, and enhancement. The LifeWater®System produces an ultra-purified, enhanced water that aids in the reduction of oxidation thus improving hydration and cellular health, facilitating absorption of nutrients and aiding the body in the reduction of acids. Essentially the ultimate water providing an environment for our cells to regenerate and flourish. Refreshingly pure and healthful...
